

Dear sir,

My humble submissions ref change in duty / Gst structure are as under:-

Since auto sector is suffering a lot rather bleeding. , I suggest to cut Gst on two Whlrs to half of present rates.

Measures shud be tkn to cut import duty on steel. Rates of steel in India hv increased 30-40%. Survival is very tough

Measures shud be tkn to advise states to cut vat on diesel and petrol to control sky rocketing prices of petroleum sector.

Measures should be tkn to control prices MRP printed on generic medicines as poor people suffer a lot , as chemists charge MRP which is sum times in sum cases more than 10 times the actual price.

Hope you will consider my suggestion
